DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 12-20, drawn to a composition comprising: (a) an oxygen labile active agent, and (b) a plant extract selected from the group consisting of Chrysanthellum extract, Neem extract, Lanatellys extract, Bacopa Monnieri extract, and Olive leaf extract, classified in class 424, subclass 761, for example.
- II. Claim 11, drawn to a composition comprising: (a) an oxygen labile active agent, (b) an isoascorbic acid derivative, (c) a tocopherol derivative, and (d) a plant extract selected from the group consisting of Chrysanthellum extract, Neem extract, Lanatellys extract, Bacopa Monnieri extract, and Olive leaf extract, classified in class 424, subclass 725 or class 514, subclass 474 or class 514, subclass 458, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the two different groups are directed to two different compositions comprising different ingredients.

The several inventions above are independent and distinct, each from the other. Further a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application. Moreover, these compositions are capable of separate manufacture, use or sale, as claimed, and are patentable (novel and unobvious) over each other (though they may be unpatentable because of the prior art) subjects.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
